HISTORIC AMERICAN ENGINEERING RECORD

American Woolen Company (Champlain Mill)

HAER No. VT-11

Location: East Canal Street, Winooski, Chittenden County, Vermont

Date of Construction: Late nineteenth century

Engineer/Builder: Unknown

Present Owner: Lake Realty Company (1981)

Significance: The Champlain Mill is a good representative example of late nineteenth century New England mill architecture. The structure is a four-story brick building, with slightly arched windows and corbelled cornice. There are also two five-story towers on the west end; the central tower was the elevator shaft, that in the southwest corner was the stair tower. There was a wood frame monitor, measuring 24 bays by 4 bays, which was removed in the early 1980s.

Transmitted by: Jean P. Yearby, HAER, 1985, from data compiled by Monica E. Hawley, Historian.
